

# COWIN EQUIPMENT AND THE PANAMA CITY, FLORIDA BUILD

In October 2018, Category 5 Hurricane Michael slammed into Panama City and other communities, leaving a broad wake of devastation along the Gulf Coast. Almost a year and a half later, the Florida panhandle is still reeling. For Janeen Horton, Kelly Gray, Karen Lynn, Irene Honeman and Emma Andreazzi, it is personal. Hurricane Michael and other storms destroyed their homes and most of their personal belongings.

With the help of Cowin Equipment, a Volvo CE dealer based in the Gulf Coast region, we partnered with Habitat for Humanity® to begin to repair what was lost for these families. In total, Cowin Equipment sent 15 of the 20 total volunteers to Panama City for a day to help out on one of the builds in early February. Fueled by the passion to help rebuild, and alongside the future homeowner, we were able to raise and close in all four exterior walls for the Habitat build.

*Kelly and her four children can soon look forward to moving into a new home. They lost everything in the hurricane back in 2018.*

# THE BUILDING TOMORROW PROJECT

*Janeen Horton was one of many thousands that lost their homes during Hurricane Michael in 2018. With help from The Building Tomorrow Project, a new house is on its way for this Panama City citizen.*

*Cowin Equipment volunteers worked to frame in and raise the four external walls on one of the Panama City builds.*

# THE BUILDING TOMORROW PROJECT

*Cowin Equipment volunteers finish one of the external walls on a home for Emma Andreazzi of Panama City.*

*Cowin Equipment volunteers raise and secure the external wall on the front of Emma Andreazzi's new home in Panama City.*
